IDEAL SERVICES

“ CQT is an independent organization, provider of services for quality since 1998 – dedicated to inspection and project management. Present in Brazil, with extensive expertise in compliance services, we provide the best solutions to improve the performance of your organization in international business.

Inspection and Site Supervision

INSPECTION FOR CONSUMER GOODS

Ensure that products, components, and materials meet specified requirements and regulatory demands.

CQT Inspection Services cover every aspect of manufacturing and distribution operations – including inspections for pre-production, in-production & pre-shipment, and loading supervision – To ensure compliance with local and industry requirements and customized specifications.

Inspection services ensure:

- The quantity produced matches with the quantity ordered.
- The visual appearance matches with the product ordered.
- The product specifications comply with the order.
- The packaging, labeling, instructions, and markings comply with mandatory standards.

CQT’s inspection services for quality can either check the first finished products getting out of the line or come in at a later stage and select samples from a pool of finished goods.

Our inspections are performed according to the requirements of ISO/IEC 17020. We issue the report within 24 hours of the service performed.

We provide four main services to check on the quality of the supplier’s products:

Pre-Production Inspection (PPI)

For timely corrections of any non-conformities detected.

During Production Inspection (DPI)

For evaluation of average product quality during manufacturing.

Pre-Shipment Inspection (PSI)

An important quality control method for checking the quality of goods.

Container Loading Supervision (LS)

To ensure that products are loaded and secured correctly.

“On-site inspection brings a clear evaluation to determine the suitability, quality, reliability, and compliance with the customer’s requirements.”

Supplier Audits

Have the international supply chain under control.

Ensure that suppliers operate in accordance with the required competence and capacity for expected production.

CQT Supplier Audit service monitor the integrity of the supply chain and ensure that systems, management and operation procedures meet expected standards. It ensures that the factory choices meet the social compliances and quality requirements. The service can also be used for periodic supplier evaluations.

The audit services bring values to the operation and offer the guarantee of the performance of the import by meeting regulatory requirements.

Factory Audit (FA)

To ensure that the chosen supplier is able to produce goods in compliance with required specifications, within the given time frame.

Social Audit (SA)

To ensure an effective and safe working environment.

Tailor-Made Supplier Audit

To ensure that the supply chain is maintaining and improving the specified standards.

We provide local professionals, bringing several advantages, such as lower travel costs and closer interaction with the process, by knowing the language and culture.

Industrial Services

INSPECTION FOR INDUSTRIAL GOODS

CQT Inspection Services for Industry Goods cover every step from raw material, manufacturing process, final inspection, and loading supervision, adding value and reliability to products, projects, and processes.

We provide services for cross-cultural and multi-lingual engineering requirements, including product design and specification development.

The service for industry goods ensures:

- The raw material, manufacturing process and final product match with the required technical specification.
- The packing, marking, loading, and documentation matches with the delivery safety principle and order requirement.

Testing

CQT Testing Service verifies the product conformance to design, properties, performance, reliability, and life-cycle. We test, assess, and certify materials and semi-finished materials (plates, tubes, forgings, cast iron/steel, and other metals).

Industry sectors we serve:

- Oil & Gas equipment and pipelines
- Power & Energy
- Chemicals
- Metals & Mining
- Building & Infrastructure
- Industrial machinery
- Industrial transportation
- Automotive
- Pharmaceuticals & Biotechnology
- Aerospace & Defense
